

in paragraph 1 of the above identified Office Action. In the amendment to the claims set forth above, the new numbers for the claims as represented by this renumbering have been used and such designation of the claims is utilized in the discussion below. Further, the line numbers of the claims in which amendments have been specified as set forth above and as set forth in the following discussion refer to the actual line numbers of the claims and not the marginal numbers.

Claims 1, 7, 8, 9, 10, 12, 13, 14, 17, 18 and 19 have been amended. No claims have been canceled. No claims have been added. The claims now in this application are claims 1 through 19, inclusive. In view of the following remarks, it is respectfully submitted that all the claims now in this application are allowable and early allowance thereof is respectfully requested.

Claim 1 has been amended to incorporate the reference to the first axis about which the rotation producing means transmits the rotary motion. The nomenclature of the first axis has full support in the specification as filed in the first paragraph on page 8. Thus, no new matter has been added.

Claims 7 through 19, inclusive have been amended to correct the dependency numbers thereof in view of the claim numbering change specified by Examiner in paragraph 1 of the above identified Office Action. Claims 7 and 13 have been amended to eliminate the double inclusion of the word "said" and in claim 7 to correct the spelling of "an".

Claim 15 has been amended to eliminate the second recitation of "a mashing

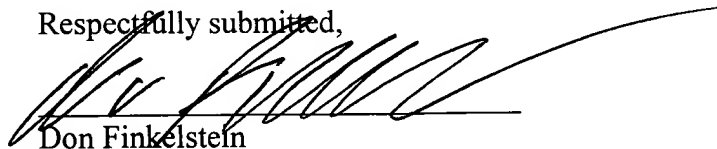

unit". As questioned by Examiner in paragraph 2 of the above identified Office Action, there is only one mashing unit in applicant's invention.

Claim 8 has been amended to clarify the terminology of the "connection" member to be consistent with the terminology in claim 1. The specification has been amended on page 7 to provide the basis for the terminology of the connection member.

The specification and the drawing (in Figure 5) have been amended to eliminate the double inclusion of the callout numeral 23. A marked up copy of sheet 3 of the drawing showing the correction in red is enclosed. The specification has also been amended as required to correct typographical and spelling errors. No new matter has been added.

It is respectfully submitted that the above amendments overcome the Claim Objection and the Claim Rejections as specified in the above identified Office Action and all claims in this application are now allowable. Early allowance thereof is respectfully requested.

Respectfully submitted,

Don Finkelstein
Attorney for Applicant
Date: October 11, 1999
